EXPERIENCE

Senior Full Stack Developer

Feb. 2026 – Present

Coreties — Logistics SaaS

Hybrid

- Operate as a forward-deployed product engineer, partnering directly with the CTO to turn customer needs into shipped logistics intelligence, CRM, email lead-generation, AI-assisted outreach, and billing workflows.
- Owned the new email lead-generation workflow and AI-assisted outbound playbook experience, spanning lead action surfaces, rewrite/follow-up UX, usage controls, inactive-connection safeguards, and full **IMAP/SMTP** email integration.
- Owned billing-system architecture across credit wallets, lot-aware grants and expiry sweeps, usage accounting, admin/member dashboards, subscription surfaces, **Stripe** portal/webhook flows, and Postgres migration/test coverage.
- Built durable **Inngest** workflows for the credit system and lead-generation pipeline, including subscription grants, credit-lot expiry, usage-accounting jobs, workflow metrics, and auto-outreach/playbook orchestration.
- Shipped customer-facing search and lead-pipeline improvements using **Next.js**, **TypeScript**, **Python**, **ClickHouse**, **PostgreSQL**, **dbt**, **BullMQ**, and **TanStack Query**.
- Improved reliability and observability across production systems with **Sentry**, **Grafana**, **Prometheus**, **OpenTelemetry**, Inngest metrics, and ClickHouse/Postgres data-integrity fixes.

Senior Software Engineer

Sep. 2024 – Jan. 2026

Hamza E-commerce

Remote

- Led frontend architecture for a multi-vendor e-commerce platform on **MedusaJS**, shipping marketplace flows across product discovery, vendor pages, wishlist, reviews, order history, and customer settings.
- Architected a feature-rich Admin Portal using **TanStack Query/Table/Router** and **Zod**, establishing conventions for form validation, data fetching, and admin workflows.
- Implemented **Chainlink** fiat/crypto price feeds, maintained Dockerized CI pipelines, and integrated **Sentry** for error boundaries, tracing, performance monitoring, and user feedback.

Full Stack Developer (Contract)

Sep. 2022 – December. 2023

Pixel Koi Co.

Remote

- Shipped full-stack client products including a **Next.js**/Supabase support and refund workflow, a high-performance **Vite** PWA, and a **React Native** health logging prototype.
- Stabilized production **AWS EC2**/Nginx infrastructure for an AQI monitoring client and configured **GitHub Actions** CI for linting, testing, and build verification.

Software Developer

Sep. 2018 – 2022

Inclusive Media Design Centre

Toronto, ON

- Led a 3-developer accessibility research product, shipping an AAC web app with **React**, **D3**, **Django**, and **OpenAI API** integration for users with severe motor impairments.
- Translated user-study feedback into product requirements, established CI/CD, managed the roadmap in **Jira**, and co-authored technical specifications that helped secure \$250,000 CAD in prototype funding.

PRODUCTS & AGENTIC TOOLING

Protoscope | *Next.js, React Native, TypeScript, Expo, ClickHouse*

2026 – Present

- Building an AI-first health and biotech platform spanning web and iOS for peptide protocol tracking, dose logging, vial management, calculators, and patient-style longitudinal health workflows.
- Designed the monorepo product architecture across **Next.js**, **Expo/React Native**, shared TypeScript packages, validation schemas, and data contracts to keep web/mobile behavior aligned.
- Shipped core user workflows including protocol builders, PK/dose calculators, vial lifecycle tracking, regimen state, check-ins, weight/lab data surfaces, and mobile-first tracking interactions.
- Built with agentic orchestration workflows to accelerate product iteration while keeping implementation, testing, and domain decisions grounded in readable code.

ctx-plugin | *Codex, Claude Code, TypeScript, Shell*

2026 – Present

- Built a multi-agent skill and workflow plugin system for **Codex** and **Claude Code**, enabling deterministic shell automation, context management, and composable agent orchestration.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, HTML/CSS

Frameworks: Next.js, React, Node.js, NestJS, Tailwind CSS, TanStack Query/Table/Router, Zod

Data & Infra: ClickHouse, PostgreSQL, dbt, Redis, BullMQ, Inngest, Docker, Stripe, AWS, GCP, Hetzner

Developer Tools: Git, GitHub Actions, Vitest, Sentry, Grafana, Prometheus, OpenTelemetry, BrowserStack, Cypress, Selenium, Jira, WebStorm, DataGrip

AI & Data Collection: OpenAI, Anthropic, Firecrawl, Apify, Puppeteer, Cheerio

EDUCATION

Toronto Metropolitan University

Bachelor of Science, Major in Computer Science

Toronto, ON

2014 – 2019
